Promethean

65"4K **75"**4K **86"**4K

The ActivPanel LX is the perfect solution for businesses wanting a secure, flexible, and affordable interactive display that's built to last.

Designed to work with your current technology platform—along with the software and apps you use on a daily basis—this robust interactive panel provides the quality, dependability, and versatility that Promethean is known for.

ActivPanel LX
for the Workplace

Why choose the ActivPanel LX

The ActivPanel LX is a reliable, high-quality technology solution that offers superior security, longevity, and flexibility for the evolving workplace environment. When you equip your offices, conference rooms, training rooms, and huddle spaces with the ActivPanel LX, you'll ensure all employees feel present and included—whether they're in the office or remote. They'll enjoy seamless communication, connectivity, and collaboration no matter where they are.

Quality you can count on far into the future

The ActivPanel LX offers an impressive array of features, so you can rest assured you'll be using it for many years to come.

- Available in three sizes to fit any space: 65", 75", 86"
- A crystal clear 4K display that leverages HDMI 2.0 technology
- Gigabit ethernet ports for uncompromised network speeds to a connected OPS device
- LCD bonded glass offering precision writing and excellent viewing experiences
- Advanced touch technology providing pen and touch differentiation, palm erase, and 20 points of touch
- Dual front-facing speakers ensuring high-quality audio in your meetings and an optional wall mount for quick and easy installation

Secure, long-lasting technology

Other interactive displays become obsolete in as little as two years because their systems are built into the panel. ActivPanel LX is different. It uses a separate computing device or laptop that can be replaced easily and inexpensively when your needs shift or security protocols change, making it one of the most secure, sustainable, and affordable interactive technology solutions on the market today.

Seamless integration with the tech you use today

The ActivPanel LX can be plugged into a laptop with a single USB-C cable, turning your computer into a large-format interactive display. It can also be paired with a computing module that fits your preferred ecosystem—whether it be Windows, Google, or Android. For meetings, easily connect a third-party camera and microphone and run Microsoft Teams or Zoom from your own device or the OPS-M.

Easy to use from the moment you turn it on

Because the ActivPanel LX works with the hardware, software, and apps you currently use, there's no learning curve. Employees can start creating, collaborating, and communicating right away. It's easy to install and set up, requiring minimal training and support from IT staff. Not only that, IT staff won't need to enrol, manage, or frequently update the panels, or deal with security issues.

Use the ActivPanel LX by connecting it to a laptop or pair it with a Promethean computing device to enable apps and ecosystem functionality:

OPS-M

This Linux-compatible Windows device provides:

- Compatibility with the Windows ecosystem and Microsoft Inking
- An all-in-one, large-format Windows experience
- Access to the Microsoft Store and OneDrive
- Ease of use with minimal training required
- Device management via Radix

Chromebox

This Google-certified Chrome OS device provides:

- Compatibility with the Google ecosystem
- An all-in-one, large-format Chromebook experience
- Access to the Google Play Store and Google Drive
- Ease of use with minimal training required
- Device management via Google Admin or Radix
